Plans with limit (p = 40)
Nesting two Latin squares (n = 10)
600 s limit
Conditions with no limit (n = 5)
Repeated trials (k = 400)
Crossing two Latin squares
(n = 12)
10 s
Nesting without counterbalancing (m = 100)
Conditions with limit (n = 12)
1 s
interpreter + import floor
wall time (s)
cells of the plan matrix (plans × trials per participant)
Conditions with limit (n × n)
Conditions with no limit (n! × n)
Plans with limit (p × 5)
Nesting two Latin squares (n² × n²)
Crossing two Latin squares (n² × n)
Repeated trials (12 × 12k)
Nesting without counterbalancing (12 × 12m)
did not finish within 600 s
